I'm a software engineer focused on solving problems using frontend technology. I am interested in user experience, accessibility, design engineering, gaming, web3, web animations, cloud and blockchain engineering.

Work Experience

Web Developer - [Contract]

07/2023 to 10/2023

Yerhma co-creation hub limited

Port Harcourt, Rivers State

- Developed and implemented an intuitive admin dashboard with diverse functionalities to streamline data management, optimize user experience, and facilitate efficient decision-making for administrators overseeing the platform.
- Designed a user-friendly interface using Sass, react-bootstrap, JavaScript, React.js and redux toolkit or dynamic user interactions and real-time updates.
- Integrated frontend components with backend services for seamless communication.

Frontend Developer Intern

11/2022 to 06/2023

Genesys

Enugu, Nigeria

[Genesys](#)

1. I and my team presented an NFT ticketing system [ticket3](#) that revolutionizes the way events are experienced by creating an entirely new dimension in the ticketing process.
2. Addressed challenges in traditional event ticketing, including scalping and counterfeit tickets, by implementing a decentralized and secure NFT-based solution.
3. Ensured interoperability with existing ticketing systems and provided a smooth transition for event organizers.

Frontend Developer Intern

05/2023 to Present

Faraday Africa

Awka, Nigeria

[Faraday Africa](#)

- Changed the existing codebase of internal link shortener to a React-based code structure.
- Ensured seamless user experience by Implementing easy navigation for efficient link management.
- Applied responsive design principles for multi-device usability.

Frontend Developer - [Contract]

06/2023 to 07/2023

Payme

Nigeria

- I and my team developed a digital solution to tackle the problem organizations face considering automating salaries and compensation based on employee performance in collaboration with their human resource management system, Utilizing essential technology seamlessly within cross-functional team to deliver a successful project (web3 included).
- Contributed to team sprint planning and project meetings and achieved development milestones and scheduled targets using tools like Agile, Scrum, solidity, MetaMask, reactjs and tailwindcss.
